MODEL 450 SL IN-LINE CHOPPER

scan here for video

In-line slitter choppers increase safety and productivity.

To meet the needs of operations that generate unruly slitter trim, SWEED offers the Model 450 SL.

This chopper is a customized version of the standard Model 450, designed specifically to operate within a slitter edge trimming production line. This unit typically features two Model 450 SL Scrap Choppers that sit on a common stand and independently accommodate both sides of trim simultaneously, as it is being produced. Slitter line scrap choppers eliminate the need for a scrap winder and increase production and employee safety. **Custom stands and additional safety upgrades are also available.**

Material Reference

The recommended model of scrap chopper is determined by scrap size, scrap volume, and requested custom features. Please consult a SWEED representative to determine the appropriate scrap chopper for your application.

- » Most sizes of slitter, plastics, or other slit products
- » For other materials, please consult SWEED

Two Model 450 SL choppers with custom infeeds, shown sitting on a custom SWEED stand.
