MODEL 5503 XHD **SCRAP CHOPPER**

scan here for video

**For Fast Efficient Processing of
Larger Scrap Materials**

The Model 5503 XHD Scrap Chopper was designed to meet the needs of operations that generate high volumes of linear scrap materials for years without serious maintenance.

It features a fast and efficient feed rate, an air actuated feedworks for operator protection, and a heavy steel plate construction. The powerful feedworks is capable of despooling and chopping large heavyreels of scrap wire and cable. The Model 5503 XHD also features a magnetic starter to protect workers from an unexpected restart after loss of power. Additional operator protection options are available.

Magnetic Separation

When coupled with SWEED's Magnetic Separator, the 5503 XHD becomes an effective ACSR processor. The 5503 XHD ACSR separation system is designed for companies producing up to a million pounds of ACSR scrap a year. For companies processing at least 300,000 pounds or more of ACSR annually, this system has very attractive payback potential!

Material Reference

The recommended model of scrap chopper is determined by scrap size, scrap volume, and requested custom features. Please consult a SWEED representative to determine the appropriate scrap chopper for your application

» Consult SWEED for material cutting reference

The Model 5503 XHD is shown sitting on and over an optional basic stand and 1/2 yard self-dumping hopper.

CONSTRUCTION FEATURES

- » Pneumatics feedworks
- » Knives have 4 usable edges and can be rotated (3 times) for extended life
- » One year limited warranty

MODEL 5503 XHD

PRODUCT SPECIFICATIONS

PERFORMANCE DATA

Electric Motor Power	10 – 25 HP
Infeed Motor Power	2 – 3 HP
Electrical Options	3 PH - Multiple voltages available
Infeed Speed	0 – 200 FPM
Cut Length	Variable
Infeed Opening	6 5/8" W x 1 5/8" H
Number of Stationary Knives	1
Number of Rotating Knives	1 standard (up to 4 optional)
Chopper Weight	3,375 lbs

Additional Protection Upgrades

- » Custom Infeed Funnels
- » Machine in Use Light Indicator
- » Wash-Down Motor & Electrical
- » Timed Shut-Off

Available Options

- » Split Infeed
- » Magnetic or Smart Starter
- » Custom Infeed Rates
- » Independent Hydraulic or Electric Feedworks
- » Multiple Rotating Knife Configurations for Smaller Cut Lengths
- » Inverter Duty Motor
- » Hydraulic Crushworks for Anti-Pillowing and Flattening Material

Optional Containers

- » 1/2 Yard EZ Dump Hopper
- » Outtake Conveyor
