MODEL TS450 TUBE SCARF CHOPPER

scan here for video

Eliminate Scarf Winders with an O.D. Tube Scarf Chopper

The Model TS450 Tube Scarf Chopper is specially designed to put an end to the dangerous business of handling hot, sharp, O.D. bead scarf.

Employees only need to thread the scarf into the tension controlled pinchroll of the chopper once per run. This eliminates repeated scrap winder threading and unloading, which helps to reduce employee injuries and increase scrap value. **Custom stands and additional safety upgrades are also available.**

Material Reference

The recommended model of scrap chopper is determined by scrap size, scrap volume, and requested custom features. Please consult a SWEED representative to determine the appropriate scrap chopper for your application.

» O.D. Tube Scarf

CONSTRUCTION FEATURES

- » Frequency drive
- » High Performance Knives for Tough Materials
- » Front roller infeed guide
- » Knives have 4 usable edges and can be rotated (3 times) for extended life
- » 24v Magnetic particle clutch
- » Advanced cooling dynamics
- » Made and supported in the USA
- » One year limited warranty
