GRADING LINE

High-Performance Grading Line: Enhance Production Efficiency and Product Quality

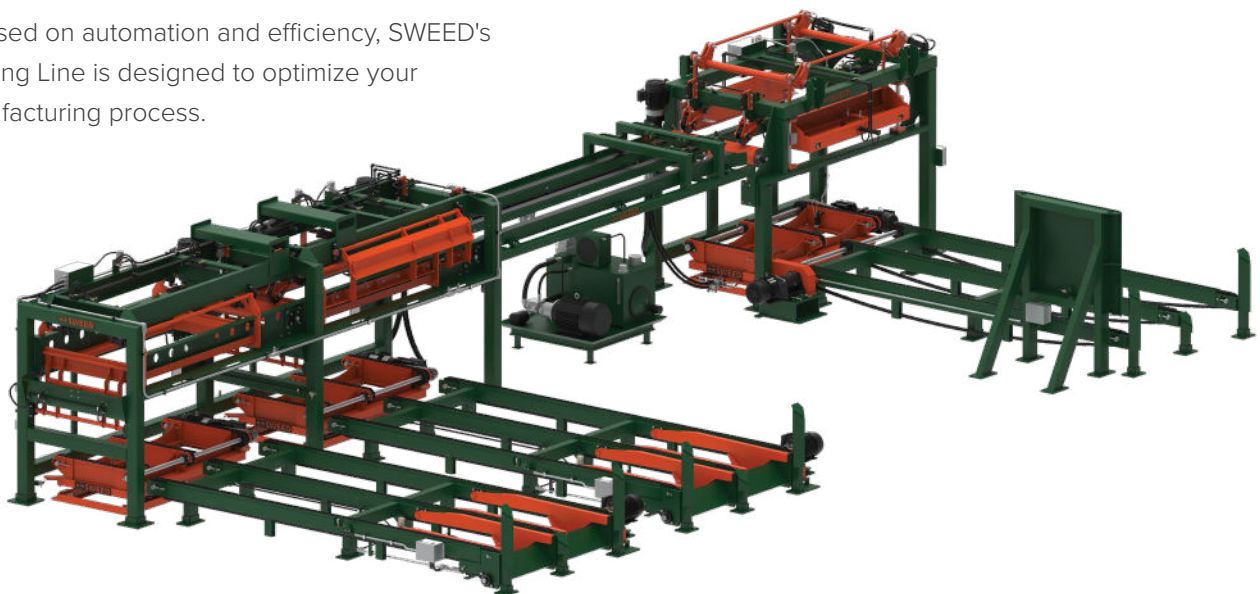

SWEED's Grading Line is a smart solution that seamlessly integrates into your manufacturing process. This advanced system ensures top-quality products and minimizes downtime for optimal production.

SWEED's Grading Line efficiently sorts and grades materials using a mechanical feed mechanism, directing them to the Dual Bin Stacker Assembly for sorting. The Grading Line separates panels into two stacks based on preprogrammed quality grades: Go (Stacker #1) and No Go (Stacker #2). By eliminating rejects beforehand, the Grading Line maintains a continuous and smooth production process, enhancing the overall flow of your operations.

Focused on automation and efficiency, SWEED's Grading Line is designed to optimize your manufacturing process.

CONSTRUCTION FEATURES

- » Designed for easy and efficient maintenance access
- » Quality craftsmanship
- » Made and supported in the USA

SWEED

653 2nd Ave, PO Box 228 | Toll Free: 1-800-888-1352
Gold Hill, Oregon, 97525 | Fax: 541-855-1165

GRADING LINE **PRODUCT SPECIFICATIONS**

PRODUCT SPECIFICATIONS

Horsepower	Configuration Dependent
Speed	» Mech Feeder Assembly: Removes Panels at 40 SPM » Infeed Chain Speed: 75 FPM » Grade Line Speed: Up to 400 FPM
Capacity	» Storage Chains Max Load: 25,000 lbs » Hoist Max Load: 8,000 lbs
Material	Panel Products, Plywood, OSB, PLV, Etc.
Air Requirements	10 CFM
Positioning	Laser Sensing/Limit Switches
Operators	1
Ship Weight	18,000 lbs
