PANEL FEEDER

Enhancing Efficiency in Panel Handling

SWEED Panel Feeders are fast and efficient solutions that use either mechanical or pneumatic methods (depending on the application) to feed individual panels from the top of the stack. This is commonly done for re-entry purposes, such as grading or patch lines.

SWEED Panel Feeders feed one panel at a time, with a speed of up to 40 panels per minute. They come equipped with accumulators for continuous feeding, a robust hoist to keep the top of the stack at the feed level, and air-operated hold-down friction wheels to ensure a steady movement.

PRODUCT SPECIFICATIONS

Horsepower	5 hp
Speed	400 FPM
Capacity	40+ SPM
Material	Panel Products, Plywood, OSB, PLV, etc.
Air Requirements	Configuration Dependent
Positioning	Laser/Limit Switch
Operators	Automated
Ship Weight	5,700 lbs
