

# SINGLE SHEET FEEDER

## Seamless Integrations for Precision and Efficiency in Production

**SWEED Single Sheet Feeders** are a high-speed and efficient solution for introducing individual sheets into a production line. Similar to SWEED's dryer infeed, the single sheet feeder moves veneer in the direction of the grain, ensuring a fast and precise feed into the production process.

The Single Sheet Feeder is fed via a robust rollcase and hoist that deliver loads of veneer to the feeder section. The vacuum feeder and air-actuated pinch roll assemblies gently, but swiftly unstack the veneer, creating a single-layer flow that propels the sheets onto a landing table or conveyor, up to 22+ sheets per minute. The Single Sheet Feeder line can be further customized to present the veneer according to your application needs.

### CONSTRUCTION FEATURES

- » Quality craftsmanship
- » Made and supported in the USA

### PRODUCT SPECIFICATIONS

|                         |                         |
|-------------------------|-------------------------|
| <b>Horsepower</b>       | 31.5 hp                 |
| <b>Speed</b>            | 350 FPM Pinchroll       |
| <b>Capacity</b>         | 22 SPM                  |
| <b>Material</b>         | Veneer                  |
| <b>Air Requirements</b> | N/A                     |
| <b>Positioning</b>      | N/A                     |
| <b>Operators</b>        | Automated               |
| <b>Ship Weight</b>      | Configuration Dependent |
