

VERSATILE VENEER STACKER

Everything You Should Expect in a Stacker

The SWEED Versatile Veneer Stacker is a unique and innovative approach to veneer stacking. Whether you stack one size of veneer, or you stack any combination of 4', 8', 9', and 10' veneer, SWEED's Versatile Veneer Stacker provides the perfect solution.

The core functionality of this versatile stacker is based on proven technology, with one major innovation; it uses a split moving plenum that allows the stacker to easily adjust to multiple lengths of veneer, consequently making traditional stackers (with multiple plenums) obsolete. Historically, stackers intended for various lengths of veneer utilized three plenums, adding to the number of belts, knock-offs, valves and more, which resulted in higher up-front costs, and were more expensive to maintain. SWEED's groundbreaking adaptable solution keeps the stacker concept simple and makes changeovers (from one length to the next) as easy as a push of a button, in less than a minute.

SWEED's innovative solution to multiple lengths also applies to standard stacking applications. The split plenum design dramatically improves accessibility, which allows for internally located knock-offs rather than the traditional exterior mounted cylinders.

This results in a more reliable, better balanced knock-off interface with the veneer, thus resulting in higher stack quality.

SWEED's Versatile Veneer Stacker is the only one in the industry that uses a simple approach to solve a traditionally complex problem. This patented design, coupled with SWEED's engineering expertise and stateside support, result in a superior solution at a competitive price, both initially, and in years to come.

CONSTRUCTION FEATURES

- » Improved stack presentation
- » Reduce labor
- » Ergonomic (No need for manual pullers on different length sheets)
- » Engineering solutions available to meet unique mill challenges
- » Designed for easy and efficient maintenance access
- » Quality craftsmanship
- » Made and supported in the USA

VERSATILE VENEER STACKER

PRODUCT SPECIFICATIONS

PRODUCT SPECIFICATIONS

Horsepower	Configuration Dependent
Speed	Up to 1,000 FPM
Capacity	4 to 10 ft Lengths
Material	Veneer
Air Requirements	Configuration Dependent
Positioning	Lasers
Operators	1 to 2
Ship Weight	Configuration Dependent

SWEED

653 2nd Ave, PO Box 228 | Toll Free: 1-800-888-1352
Gold Hill, Oregon, 97525 | Fax: 541-855-1165
